SUMMARY

Data Science and Machine Learning Engineer with hands-on experience in building predictive models, statistical analysis pipelines, and AI-powered applications. Proficient in Python, SQL, Scikit-learn, XGBoost, PyTorch, FastAPI, and LLM-based systems. Focused on transforming raw data into actionable insights and delivering intelligent solutions with measurable business impact.

WORK EXPERIENCE

Infinite Computer Solutions

June 2026 – July 2026

Data Analytics & Software Development Intern

- Conducted EDA on confidential UPPCL electricity meter data across 3+ dataset categories; delivered 2 Power BI dashboards and client presentations, cutting manual reporting time by 30%.
- Debugged and maintained Java modules across 5+ components within production software, supporting SDE workflows including code review and collaborative development.

To The New

May 2025 – June 2025

User Interface Designer

- Designed intuitive interfaces that elevated usability by 25% and boosted user engagement by 30%.
- Delivered 10+ wireframes and interactive prototypes in Figma, accelerating development cycles by 20%.
- Built reusable component systems in collaboration with developers, reducing UI inconsistencies by 40%.
- Implemented WCAG 2.1-compliant accessibility features, making the product usable for 15%+ more users.

PROJECTS

Zomato Analytics

Python, Pandas, Scikit-learn, XGBoost, SciPy

- Built an end-to-end restaurant analytics pipeline using 49,011 Zomato records, covering EDA, statistical hypothesis testing, and binary classification.
- Validated key business claims using Mann-Whitney U and Spearman correlation tests; found online ordering has a negligible effect on ratings ($\Delta=0.049$, $p<0.0001$) despite being a top feature for engagement prediction.
- Trained an XGBoost classifier achieving 80.2% accuracy and ROC-AUC of 0.89; identified price tier as the dominant success predictor (importance=0.26).

Robust Portfolio Optimization (LSTM/ERC)

Python, TensorFlow, LSTM, NumPy

- Engineered an ERC-based risk-first allocation strategy that enhanced portfolio stability by 40% versus an equal-weight baseline.
- Developed LSTM forecasting with noise-aware optimization across 10+ financial assets, reducing forecast error by 18% over a 30-day rolling window.
- Elevated the Sharpe Ratio from -0.187 to **0.465**, a 149% gain in risk-adjusted returns.

Contract Lifecycle Management (AI-CLM)

FastAPI, Gemini API, ChromaDB, RAG

- Architected a 6-agent AI system using FastAPI and Gemini API to process contracts of 75+ pages end-to-end, eliminating manual triage for 100% of ingested documents.
- Applied RAG with ChromaDB vector embeddings and OCR, enabling semantic clause retrieval with 92% retrieval precision on legal documents.
- Boosted clause-level reasoning accuracy by 35% over baseline prompt-only extraction and cut manual review time by 50%.

EDUCATION

Vellore Institute of Technology

Vellore, Tamil Nadu

Bachelor of Technology in Information Technology

Aug 2023 – Present

CGPA: 8.27/10

The Vivekananda School

Delhi, India

Class XII: 86.4%

SKILLS

Languages: Python, Java, SQL, JavaScript, HTML, CSS

Databases: MySQL, MongoDB

ML & Data Science: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Keras, XGBoost, EDA, Feature Engineering, Hypothesis Testing, Regression, Classification, Model Evaluation, Cross-Validation, ROC-AUC

AI & LLM Systems: RAG, Vector Embeddings, ChromaDB, Prompt Engineering, LLM Application Development

Tools & Platforms: FastAPI, AWS, Power BI, Figma, Canva, Microsoft Office

CERTIFICATES

- Quantitative Research Job Simulation** – Forage
- Oracle Certified Generative AI Professional** – Oracle University
- Python for Data Science and Machine Learning Bootcamp** – Udemy
